EDUCATION

FAST National University of Computer and Emerging Sciences

Aug 2022 – May 2026

Bachelor of Science in Software Engineering

Relevant Coursework: Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Operating Systems, Software Architecture, Generative AI

EXPERIENCE

GenAI Engineer (Freelance)

2025 – Present

Generative AI & Deep Learning Engineer

- Built and fine-tuned transformer-based deep learning models for real-world applications.
- Developed Generative AI solutions using LLM APIs and vector databases.
- Designed end-to-end AI pipelines from data preprocessing to deployment.
- Integrated AI models into scalable web applications using REST APIs.
- Applied MLOps practices for model deployment, monitoring, and optimization.

Junior Software Engineer— MediSync Solutions

Jun 2025 – Jul 2025

Full-Stack & DevOps Engineer

- Developed a healthcare management platform using React, Next.js, and TypeScript.
- Implemented modern, responsive UI for efficient medical workflow management.
- Containerized applications using Docker and deployed services on Kubernetes.
- Implemented CI/CD pipelines using Jenkins for automated builds and deployments.
- Managed production hosting, domain configuration, and deployment.

PROJECTS

HR Automation System (FYP) — React, Python, ML, AI Interviews

2025 – 2026

- Built an end-to-end HR automation platform for recruitment and employee management.
- Implemented an AI interview bot conducting automated video and audio interviews.
- Extracted insights from candidate responses using speech and facial analysis techniques.
- Automated resume screening and candidate shortlisting using machine learning models.

Autonomous Car Driving Model — TensorFlow, Keras, OpenCV

- Developed an autonomous driving model using NVIDIA's deep learning architecture.
- Predicted steering angles from car camera images with real-time inference.

MediSync Solutions Website — Next.js, React, TypeScript

Jun 2025 – Jul 2025

Designed and deployed a production-ready healthcare platform with modern UI/UX, hosted on Hostinger with domain integration via GoDaddy. [Live]

DevOps Deployment Pipeline — Docker, Kubernetes, Jenkins

Deployed containerized projects on Kubernetes clusters using Docker, with fully automated CI/CD pipelines integrated through Jenkins.

TECHNICAL SKILLS

Web Development: MERN Stack, HTML, JavaScript, Tailwind CSS, REST APIs

DevOps & Tools: Docker, Kubernetes, Jenkins, Git, GitHub, Linux, CI/CD

AI & ML: Machine Learning, Neural Networks, TensorFlow, Flask

Deep Learning & GenAI: LLMs, Transformers, GANs, LSTMs
