

Badar Faisal

Islamabad, Pakistan — 0307-7675360 — badarfaisal98@gmail.com — LinkedIn — GitHub

EDUCATION

FAST National University of Computer and Emerging Sciences

Aug 2022 – May 2026

Bachelor of Science in Software Engineering

Relevant Coursework: Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Operating Systems, Software Architecture, Generative AI

EXPERIENCE

Software Engineer — Kamaan

March 2026 – Present

Full-Stack & DevOps Engineer

- Designed and developed scalable software solutions for real-world applications.
- Built and integrated API-driven services, including third-party and AI-based APIs.
- Developed end-to-end data processing pipelines from data ingestion to deployment.
- Integrated backend services with web applications using RESTful APIs.
- Implemented deployment, monitoring, and performance optimization practices.

Junior Software Engineer — MediSync Solutions

Jun 2025 – Jul 2025

Full-Stack Engineer

- Developed a healthcare management platform using React, Next.js, and TypeScript.
- Implemented modern, responsive UI for efficient medical workflow management.
- Containerized applications using Docker and deployed services on Kubernetes.
- Implemented CI/CD pipelines using Jenkins for automated builds and deployments.
- Managed production hosting, domain configuration, and deployment.

PROJECTS

HR Automation System (FYP)

2025 – 2026

React, Python, Machine Learning, AI Interviews

- Developed an end-to-end HR automation platform for recruitment and employee management.
- Built an automated interview system supporting video and audio-based candidate assessments.
- Implemented data analysis features to extract insights from candidate responses.
- Designed a resume screening and candidate shortlisting system using intelligent filtering techniques.

Autonomous Car Driving Model

TensorFlow, Keras, OpenCV

- Developed a self-driving car model using deep learning-based architecture.
- Implemented real-time prediction of steering angles from camera input data.

MediSync Solutions Website

Jun 2025 – Jul 2025

Next.js, React, TypeScript

- Designed and deployed a production-ready healthcare platform with modern UI/UX.
- Managed hosting, domain integration, and deployment on live servers.
- Live Project Link

DevOps Deployment Pipeline

Docker, Kubernetes, Jenkins

- Built and deployed containerized applications using Docker and Kubernetes.
- Implemented automated CI/CD pipelines using Jenkins for continuous integration and delivery.

TECHNICAL SKILLS

Web Development: MERN Stack, HTML, JavaScript, Tailwind CSS, REST APIs

DevOps & Tools: Docker, Kubernetes, Jenkins, Git, GitHub, Linux, CI/CD

AI & ML: Machine Learning, Neural Networks, TensorFlow, Flask, Pandas, NumPy

Deep Learning & GenAI: LLMs, Transformers, GANs, LSTMs
