

Badar Faisal

Islamabad, Pakistan

0307-7675360 — badarfaisal98@gmail.com — LinkedIn — GitHub

EDUCATION

FAST University, Islamabad

Aug 2022 – May 2026

B.Sc. in Software Engineering

Relevant Coursework: Data Structures, Algorithms, Artificial Intelligence, Systems Programming, DBMS, Generative AI, Software Architecture

EXPERIENCE

GenAI Engineer (Freelance – Upwork)

2025 – Present

Generative AI & Deep Learning Engineer

- Designed and developed **MediSync Solutions** (<https://medisyncsolutions.net>), an AI-powered healthcare platform.
- Built and fine-tuned transformer-based deep learning models.
- Implemented Generative AI solutions using LLM APIs and vector databases.
- Developed end-to-end AI pipelines from preprocessing to deployment.
- Integrated AI models into scalable web applications using REST APIs.
- Applied MLOps practices for deployment, monitoring, and optimization.

PROJECTS

HR Automation System (FYP) — React, VectorDB, Python

2025–2026

- Automated recruitment and employee workflows using ML-driven systems.
- Implemented authentication, role-based access, and Firebase storage.

MediSync Solutions Website — Next.js, React, TypeScript

2025

- Developed a responsive healthcare platform with scalable UI/UX.
- Deployed with custom domain and production hosting.

Historical Image Reconstruction — Real-ESRGAN, DeOldify

2024

- Enhanced and restored historical images using AI-based super-resolution.
- Applied DeOldify for realistic colorization of black-and-white images.

DevOps Deployment Pipeline — Docker, Kubernetes, Jenkins

- Built CI/CD pipelines and deployed containerized applications.

TECHNICAL SKILLS

Web: MERN Stack, HTML, JavaScript, Tailwind CSS, REST APIs

AI/ML: Machine Learning, Neural Networks, TensorFlow, Flask

GenAI: LLMs, Transformers, GANs, LSTMs, Vector Databases

DevOps: Docker, Kubernetes, Jenkins, Git, Linux, CI/CD

CERTIFICATIONS

DevOps on AWS – AWS

Neural Networks and Deep Learning – DeepLearning.AI

Machine Learning – Simplilearn
